The bill been the committee on banking and currency by Mr. Orspo, in relation to the circulation of the Bensed hank notes repeals section in the day has Bensed Statutes, which limits to whom you \$500.000 the semilation of banks organised after full like, 1870, and also repeats the kinding scale of per centage of Montaling la section 5171. The bill change the section has mamed so that it will provide that the dicultating notes delivered in exchange for conditability notes delivered in exchange for conditability notes in amount to sinety per condital the current market value. not exceeding per of the United States bonds so transferred and delifered; and at natine shall the stotal amount of such notes issued to any such association exceed the amount at such time actually paid in of the capital stock. The

nominities makes the following statement in

The purpose of this bill is to place all national banks upon the same footing in refurence, to this percentage of circulating notes which may be issued to them upon the deposit of government bonds. In this indigment of your committee there is now no good teach which may be issued to them upon the deposit of government bonds. In this indigment of your committee there is now no good teach may be not a capital of siles of the control of the same date, may have a circulation of \$300,000, while another hour with open capital in restricted to \$500,000. Under the policy which now prevails of free banking there should be no discrimination of rivulation on account of the amount of capital fund. The chargin of 10 per cent. affords an abundant security to the nucl-folder in addition to the limiting of the sinceholders. This bill ments the dilipated question whether, if the public debt at any time falls below par in the market, the comptroller shall call for additional bonds for the protection of the holders of national bank notes. By the provision of the bill, circulation can never be issued beyond \$0 per cout of the part value of the bonds, however high a rate premium they command, then if at any time and from any cause bonds fall below par then premium they countract, but if at any time and from any cruse bonds fall below par, then the margin of the per cent busts by maintained upon the actual market price of the bonds de-posited as security.
